Muhammad Zeeshan

Computer Science Student | Software Engineer

zeeshanxbuilds@gmail.com | 03210979990 | GitHub | LinkedIn

Objective

Computer Science student transitioning from mobile-first Flutter development into full-stack web dev. Shipped Flutter apps end-to-end – Firebase, and Git-based collaboration – and use AI tools like Claude and ChatGPT to speed up research and boilerplate work.

Education

BSCS Nov. 2026 – Present
Virtual University of Pakistan *Lahore, Pakistan*
–

ADP Computer Science Completed
Virtual University of Pakistan *Lahore, Pakistan*
–

Technical Skills

Frontend: Flutter, Dart, HTML, CSS, JavaScript (coursework fundamentals), Tailwind CSS, React.
Backend: Firebase (Auth, Firestore, Cloud Functions), OAuth, Cloudinary.
Tools & Workflow: Git, GitHub, AI-assisted development (Codex,Kiro,Antigravity), Figma, Postman, Android Studio, VS Code.

Professional Experience

IT Support Apr. 2026 – Sep. 2026
Freelance/Independent Contract *Lahore, Pakistan*

- Provided direct technical support and troubleshooting for end-users, successfully diagnosing hardware and software issues to minimize system downtime

Flutter Developer Intern November.2025 — April.2026
Acme Digital Solutions *Lahore, Pakistan*

- Built and shipped cross-platform mobile features for Android and iOS using Flutter, maintaining 99.9% crash-free sessions to protect app store rating and user retention.
- Converted Figma designs into responsive UI components, cutting design-to-release turnaround for the team.
- Debugged and fixed memory leaks tracked via Git, reducing app load times and improving user retention.
- Integrated Firebase (Auth, Firestore, Cloud Functions) for real-time sync and secure login across devices.

Business Development Representative Nov. 2023 – May 2024
Hubex Tech *Lahore, Pakistan*

- Ranked #2 top-performer for exceeding monthly targets, communicating technical product details to non-technical prospects daily under deadline pressure.

Key Projects

E-Commerce Bookstore App | *Flutter, GetX, Firebase, REST APIs, Git* Jan. 2026

- Built a full-stack bookstore app with Firebase Auth and real-time inventory updates, removing manual refresh for users.
- Used GetX and Firebase to keep cloud data in sync across device.

Cloud Notes Manager | *Flutter, Firebase, Cloudinary, Git* Nov. 2025

- Built a productivity app with cross-device sync and Cloudinary API integration for image hosting, cutting manual file handling for users.
- Designed a minimalist UI and managed feature branches in Git, keeping onboarding simple and commit history clean.
